-  NO CONSUMABLES

Application

Female

60% female are affected by UI between the ages of 45 and 55

Male

15% male are affected by UI over the ages of 60

Urinary Incontinence (UI) — the loss of bladder control — is a common and often embarrassing problem. It is a symptom that is caused by a variety of things, including childbirth, pregnancy, aging, hysterectomy, menopause, and neurological disorders.

WOMEN

Pregnancy

Childbirth

Hysterectomy

Menopause

Prostate Problems

Bladder Damage

Urinary Stones

Sphincter Problems

MEN

Aging

Neurological disorders

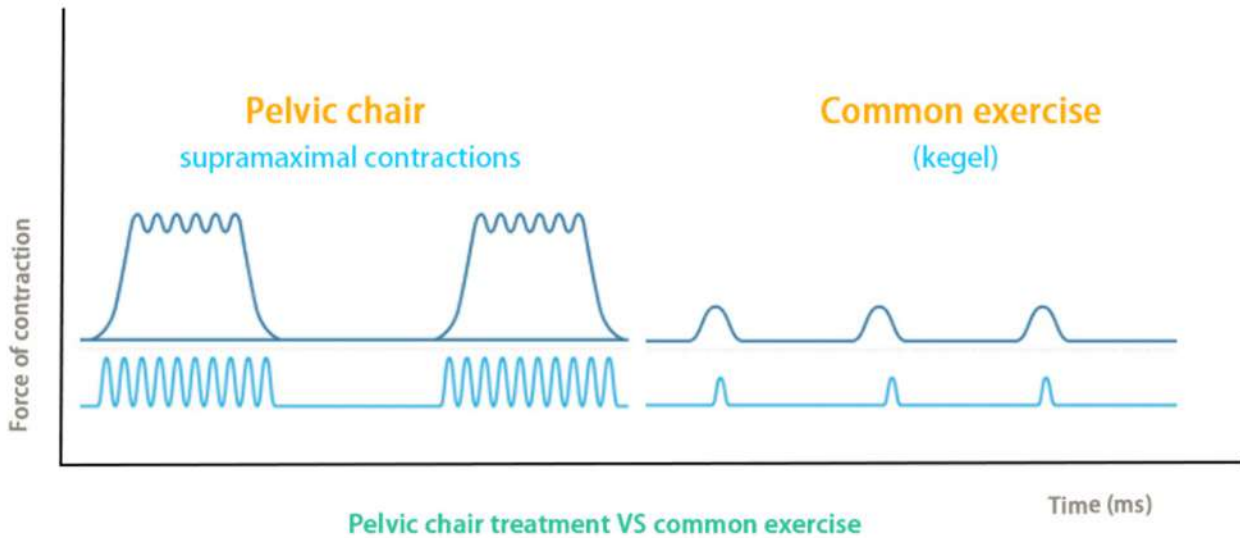

Obesity

Pelvic Trauma

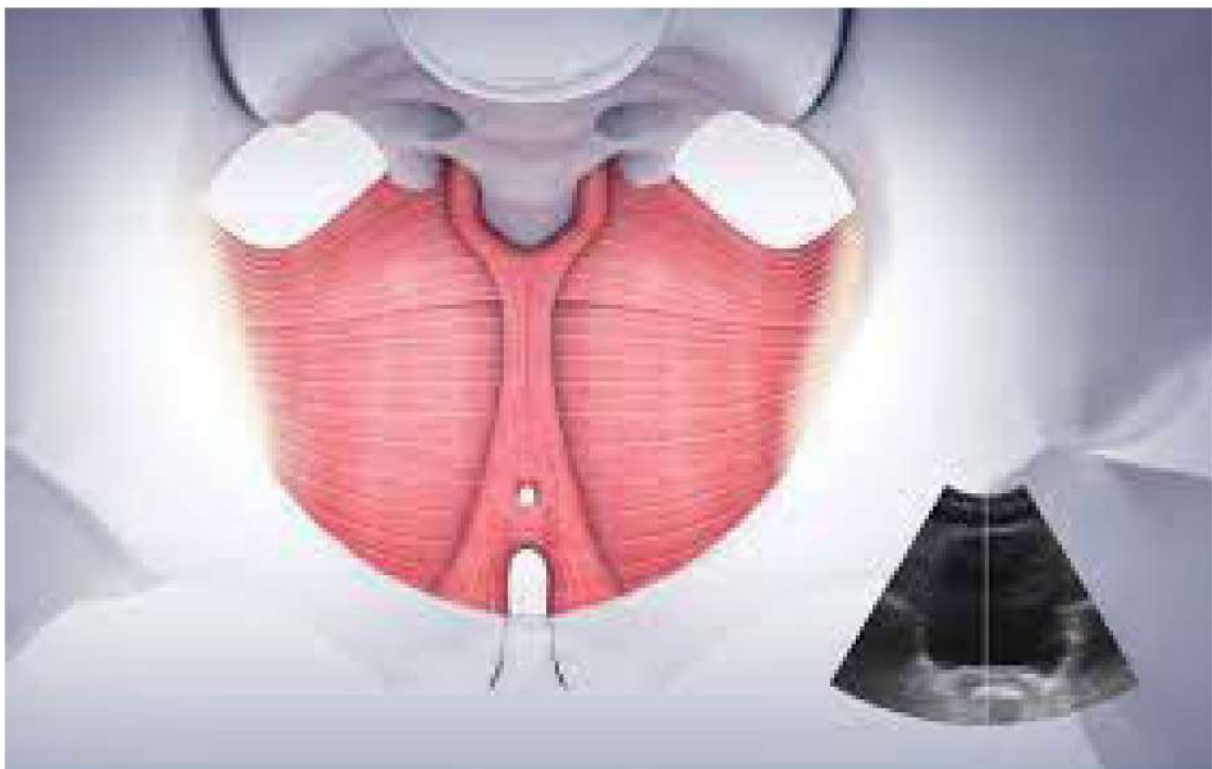

Theory

Myogram

Emchair is a non-invasive treatment for treating urinary incontinence and vaginal laxity. The study proves Emsella to improve stress urinary incontinence (SUI) by 95%.

Our Pelvic chair uses the same technology as the Emsella chair. 28 to 30minutes treatment could bring a immediate improvement for the pelvic muscle floor.

Backed by science

NO PILLS, NO PADS, NO SURGERY

This unique technology revolutionizes the women's intimate health and wellness category by providing those suffering from incontinence with a completely non-invasive option.

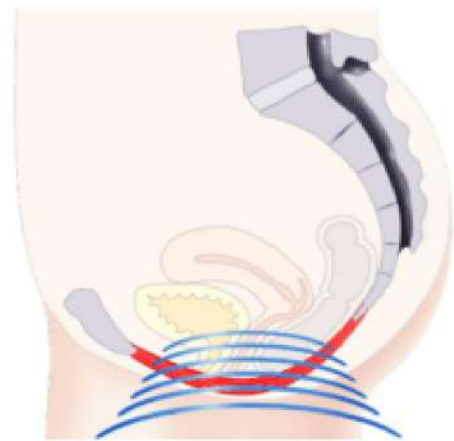

BEFORE

Pelvic floor muscles insufficiently support pelvic organs and affect bladder control.

TREATMENT

EM BELLA effectively stimulates pelvic floor muscles with thousand of contractions per session.

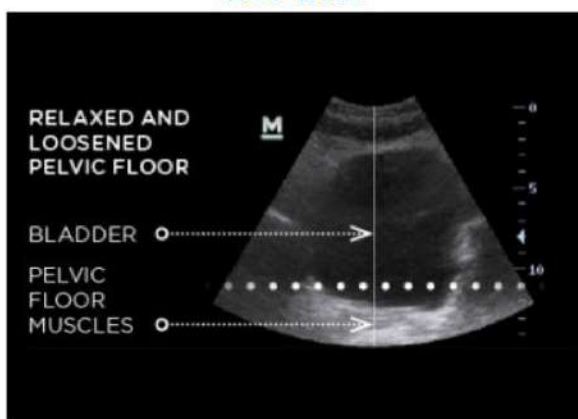

AFTER

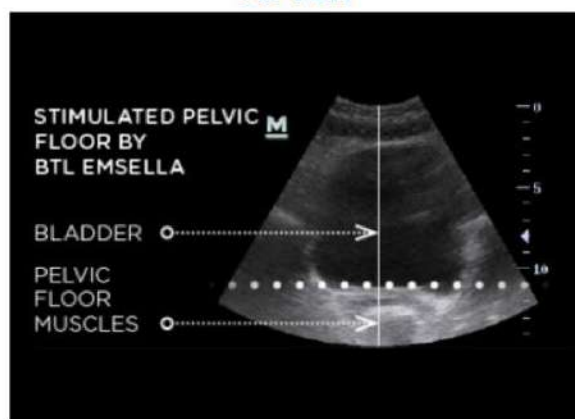

Stimulation leads to regained control over pelvic floor muscles and bladder.

A course of treatment needs 6 sessions, each session only takes 30 minutes, scheduled twice a week.

Testimonials

DR. ALEX

We place all our stress incontinence and overactive bladder patients on this chair. They are loving the 28-minute treatments. It is so easy sitting fully clothed on the chair, reading a magazine, and getting a full pelvic workout as if you had a private pelvic floor trainer beside you without the sweat!"

DR. YASMINE

I have never seen anything quite as innovative as the VIMYAGE CHAIR for the treatment of incontinence. After treating and observing 24 different women with both urge and stress and mixed forms of incontinence I was pleasantly surprised and happy to see the relief my patients obtained from this therapy.

DR. Uzair

The results have been really rewarding. There are many patients who really call this a life-changing experience. When we treat the patients with VIMYAGE, whether we are doing a RF treatment in conjunction or laser treatment in conjunction, one of the things I am most impressed with as a provider is how much their lives are changed.
